Decolonial Feminist Perspectives on Artificial Intelligence

19.06.2025 | University of Bremen | GW 1

We kindly ask for registration for the workshop:

This symposium seeks to explore the possibilities and contradictions surrounding AI. It brings together decolonial feminist perspectives and research on artificial intelligence and opens a space for critical reflection on living with and thinking about ethical futures in relation to AI. Through a transnational approach, the symposium foregrounds diverse positionalities, contested imaginaries, and political struggles that shape — and unshape — the trajectories and ideologies of AI technologies and ethics.
